

PlantDox

Advanced AI-powered plant health monitoring system. Upload, identify, and protect your plants with instant disease detection and personalized care recommendations.

Start Scanning Now

Key Features

Instant Plant Analysis

Upload plant images for immediate identification and health assessment using advanced AI technology.

Disease Detection

Detect plant diseases early with severity indicators and actionable treatment recommendations.

Real-time Health Score

Health History Tracking

Monitor your plant's health over time with detailed scan history and progress tracking.

Get detailed health scores (0–100) with comprehensive analysis of your plant's condition.

QR Code Reports

Generate and share QR code reports containing plant details and treatment suggestions.

Weather Alerts

Receive real-time weather-based disease risk alerts for proactive plant protection.

Community Insights

Contribute to and benefit from crowdsourced disease reporting and prevention.

Care Guides

Access personalized plant care guides with watering, sunlight, and fertilization tips.

Beginner Friendly

Step-by-step guidance for new gardeners with expert tips and common mistake prevention.
